Participants given the opportunity to ask questions on the presentations
- 14:00**            **Interactive Time**  
Participants invited to review display material, speak to project team members and provide comments
- 16:00**            **Event Closes**

## Introduction:

CNRI wish to run a consultation event that allows stakeholders to engage and share their opinions to inform future decision making. The project team are grateful for the contribution of stakeholders and recognise the demands on their time. Therefore this event will not be in a traditional workshop style but will be focussed on minimising the time participants spend listening to presentations or in break-out groups and maximising the time for stakeholders to have one to one conversations with the project team. The morning will focus on environmental aspects and the afternoon will focus on social and economic themes, participants are invited to attend for as much of the day as they wish. There will be a number of methods for participants to record their comments in the form of Q&A forms, presence of note takers and directly annotating material displayed in the room.

## Notes for participants:

- Participants are free to attend all or part of the day and will not be required to stay for all sessions. Participants with a particular interest in environmental aspects are encouraged to attend in the morning and those most interested in societal aspects in the afternoon. However, the project team will be available throughout the day and happy to engage in discussions on any aspects of the project at any time. Hence, those attending in the morning will still be able to discuss societal aspects and vice versa.
- Refreshments will be available throughout the day.
- A breakout facility will be available for people to peruse hard copies of material.
- The event will be open to all on the day and participants who are not on the delegate list will be required to register their details at reception.
- Whether participants choose to attend for the whole morning, afternoon or any part of the day they are invited to join the project team for a buffet lunch which will be served informally between 12:30 and 13:15.

## Venue details

The workshop will be held at the Aberdeen Science Centre (ASC), located in Aberdeen's city centre at the address below. Car parking facilities are available at ASC as well as adjacent to the venue. For more information, please visit <http://aberdeensciencecentre.org/>.
